

Nissan SR20DET RWD ProStreet Manifold Notes

Application

S13---1989-1994 240sx

S14---1995-1998 240sx

This manifold can only be used on cars with the following:

- manual transmission
- non abs
- manual transmission brake booster
- manual transmission master cylinder

The automatic transmission cars use a brake booster/master cylinder combination that is longer than the manual transmission equipped cars. **If the automatic transmission brake parts are used, the manifold will not fit.** All chassis's must use the manual transmission non abs parts in order to ensure perfect fitment.

If you have any additional questions feel free to contact toll free at (866) FullRace or via email at sales@full-race.com.
