

Full-Race front mount intercooler installation guide.

Mounting the FR FMIC is as simple as trimming the radiator support, drilling holes for the hardware, and then fastening the unit. The following pictures display a 20*11*3 in. backdoor FMIC properly installed on a '92-95 Civic coupe. The 20*8*3 in. backdoor and the 22*8*3 in. traditional style FMICs are mounted almost indentially.
